Natural Gas Lighting

**Reliable.
Comfortable.
Convenient.**

Elegant. Attractive. Gas Lighting.

Use outdoor natural gas lighting anywhere you want decorative lighting or lighting for extra security. There's a natural gas light for just about any outdoor use - around your home, along the driveway, in the garden, in an entryway, on the patio or next to your gas grill.

You'll enjoy light from a natural gas lantern as soon as it's dark. So there's no need to worry about coming home to a dark house or stumbling in the dark around your patio or walkway. And, gas lights produce as much light as a 100-watt electric bulb without the harsh glare or shadow of electric lights.

Dependable natural gas lighting is even more efficient with automatic dimmers or on-off switches attached to the lights.

Beautiful.

- Open flame lantern adds "Old World" charm

Dependable.

- Work when the power is out

Variety.

- Choose from a variety of styles, shapes and features
